PROFESSIONAL SUMMARY

Analytical and detail-oriented Physics graduate transitioning into software development. Possesses a strong foundation in programming logic, web development, and data analysis. Experienced in promoting a goal-oriented approach through practical problem-solving in academic research and independent tech projects. Ready to leverage technical skills and real-time operational experience to contribute effectively to a development team.

WORK EXPERIENCE

PART-TIME, BALE ATK – Lombok Barat, NTB

Cashier (June 2023 – May 2025)

- Managed customer payment transactions accurately and ensured daily financial reconciliation.
- Provided excellent customer service, handled real-time problem solving, and maintained high attention to detail in a fast-paced retail environment.

EDUCATION

UNIVERSITAS MATARAM, *Bachelor Of Science In Physics* | (2022 – 2026)

- **Research Focus:** Conducted comprehensive research on materials science, specifically the synthesis and characterization of nanocomposites (Graphene Oxide and magnetic nanoparticles) for methylene blue adsorption.

PROJECT

➤ SMART CASH FLOW SYSTEM

- Built a comprehensive full-stack personal finance web application to manage and analyze daily income, expenses, and asset allocations.
- Developed the backend using Java and Python and PostgreSQL for secure database management, and tested API integrations using Postman.
- Designed the frontend using HTML and CSS, featuring an interactive dashboard with graphical data visualization and a multi-pocket budgeting system to categorize funds effectively.

➤ AIQU SALES MANAGEMENT SYSTEM

- Developed a web-based sales and operational recording system for a local water refill business (Aiqu) to replace manual bookkeeping.
- Utilized HTML, CSS, and JavaScript to build a user-friendly interface with modular navigation.
- Implemented core business features including daily sales tracking, debt/cash advance (kasbon) management, automated reporting, and financial summaries to streamline the business's daily operations.

➤ RESPONSIVE PORTFOLIO WEBSITE

- Built a fully responsive personal web portfolio to fulfill the Dicoding web development scholarship submission.
- Implemented front-end technologies including HTML, CSS, and Flexbox to ensure cross-device compatibility.

TECHNICAL SKILLS

Category	Skills
Programming Languages	Java, Python, JavaScript, HTML, CSS
Databases & Tools	PostgreSQL, Postman, Git, GitHub
Core Concepts	Full-Stack Development, API Testing, Recursion Methods, Object-Oriented Programming (OOP)
Soft Skills	Analytical Thinking, Real-Time Problem Solving, Detail-Oriented
